

TOPIC	INDICATOR	URBAN COASTAL	RURAL COASTAL	INTERIOR	TOTAL
MATERNAL AND NEWBORN HEALTH	Antenatal care (ANC) (one time)	87.2	87.2	56.7	81.4
	Antenatal care (one or more times during pregnancy)	89.6	97.5	97.5	95.6
	Blood sample taken during ANC	87.3	90.6	43.6	80.9
	Blood pressure measured during ANC	85.7	93.1	79.3	88.7
PERSON ASSISTING AT DELIVERY	Institutional deliveries	88.5	89.1	55.7	82.6
	Any skilled personnel	88.9	90.5	54.6	83.3
	Community health worker	0.0	1.7	12.8	3.4
	Traditional birth attendant/relative/friend	0.7	3.9	22.3	6.7
	No attendant	0.0	1.3	3.5	1.4

Antenatal care (ANC) refers to women aged 15-49 years that were attended to during pregnancy in the 2 years preceding the survey by skilled health personnel. All values are in percentages.

The Guyana Multiple Indicator Cluster Survey (MICS) was conducted in 2006 by the Bureau of Statistics to monitor the situation of children and women at the national and sub-national level. The primary objectives are to provide up-to-date information for assessing the situation of children and women; to furnish data needed for monitoring progress toward the Millennium Development Goals, the goals of A World Fit For Children (WFFC), and other internationally agreed upon goals; to contribute to the improvement of data and monitoring systems in Guyana and to strengthen technical expertise in the design, implementation, and analysis of such systems.
