### 1. JUSTIFICATION/BACKGROUND

Statistically sound and internationally comparable data are essential for developing evidence-based policies and programmes, as well as for monitoring countries' progress toward national goals and global commitments. Since 1995, UNICEF has supported the implementation of the Multiple Indicator Cluster Surveys (MICS), assisting countries in generating high quality data on the situation of children and women. Over the last 17 years and four rounds of MICS, 240 MICS surveys have been conducted in more than 100 countries.

MICS enables countries to produce statistically sound and internationally comparable estimates of a range of indicators in the areas of health, education, child protection, water and sanitation and HIV and AIDS. For many countries, MICS surveys are among the most important sources of data used for situation analyses, policy decisions and programme interventions, and for influencing the public opinion on the situation of children and women.
