

## MICS DATA PROCESSING WORKSHOP

### Dedeman Hotel, Istanbul, Turkey

### 4-14 May, 2015

## AGENDA

### What is the objective of the workshop?

The workshop will be attended by MICS survey teams that are planning their fieldwork in 2015 and have produced the draft questionnaires that have been reviewed by MICS teams at Regional Offices and New York Headquarters (see below for more details). The workshop will provide an opportunity for MICS survey teams, with the assistance of data processing experts, to:

- Strengthen their knowledge on MICS data processing and CAPI methodology, protocol and standards;
- Finalize data entry and CAPI data collection application based on the draft questionnaire by the end of the workshop;
- Get familiar with the MICS standard tabulation plan and SPSS analysis programs;
- Start archiving process using IHSN toolkit.

### Workshop expected results:

- Strengthened skills in the utilization of the two software packages used by MICS: CPro and SPSS;
- Enhanced understanding of MICS data processing methodology, protocols, standards and technical guidelines on how to build and customize the standard MICS Data Entry and Editing, and CAPI data collection application in CPro;
- Strengthen knowledge on how to adapt the standard MICS tabulation programs using SPSS;
- Familiarized on how to customize the standard survey archive using the IHSN toolkit.

### Workshop related preparations and documents to bring

Survey teams are expected to bring the following documents and files to the workshop:

#### Survey documents

- Draft MICS questionnaires (in UN and local languages)
- Survey plan
- Immunization schedule
- Education system (School levels, grades, ages, etc.)

**Participants should have one laptop per team (using at least Windows 7). For teams that already have tablets for data collection, it is recommended that minimum 2 tablets are brought for testing purposes.**

### Useful information:

The standard presentations for this workshop are available at (<http://mics.unicef.org/workshops#data-processing-workshops>). In order to accommodate specific survey content in the participating surveys and because of ongoing updates and improvements, the content of each workshop is slightly different. However, you may find it useful to browse the standard content in preparation for the workshop.

CPro, SPSS and IHSN Toolkit installation packages, as well as standard MICS CAPI application, SPSS analysis programs and IHSN Archiving Template will be provided to the participants during the workshop.
